

Digital Surveillance System

See what is going-on in your business

- Improve your employee's productivity
- Reduce your losses of time, tools and material
- Monitor your traffic and the availability of your employees
- Instantly obtain a general view of your operations
- Access your pictures, locally and remotely, through the internet
- Record digital quality, time stamped, pictures of your activities
- Easily and quickly review any recorded event
- Help your receptionist to properly dispatch the calls
- Keep valuable proofs in case of robbery, conflict or accident

Could be your best investment to improve your company profitability

Allowing information to be stored and shared, the powerful, efficient and inexpensive **EAGLE DIGI EYE Digital Surveillance System** is rapidly becoming indispensable for today's management. It is the only solution that allows managers to instantly access live or recorded events, locally or from anywhere in the world.

Storing many weeks of events and maintenance free, this multi users reliable computer based system, with Windows 2000 Professional, records high quality colour pictures.

Our qualified technicians will do the installation and the training. They will also be available to give you the full support you deserve.
